

MAHESH S

AI/ML ENGINEER | MACHINE LEARNING | GENERATIVE AI | SOFTWARE ENGINEERING

+91 6362544048  viratmahesh11@gmail.com    Portfolio

PROFESSIONAL SUMMARY

AI/ML Engineer (B.E. in AI & ML) with hands-on experience building machine learning, deep learning, NLP, computer vision, Generative AI and agentic AI systems. Strong in Python, PyTorch, TensorFlow, Scikit-learn, SQL, FastAPI, React, TypeScript and Docker, with end-to-end work on RAG pipelines, multi-agent LLM workflows, prompt engineering, model evaluation and full-stack AI products.

TARGET ROLES

AI/ML Engineer (primary) • Machine Learning Engineer • AI Engineer • Data Scientist • Data Analyst • Software Development Engineer (SDE) • Forward Deployed Engineer (FDE)

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, SQL, Kotlin, HTML, CSS, Data Structures & OOP

AI / Machine Learning: Machine Learning, Deep Learning, ANN, CNN, RNN, Transformers, NLP, Computer Vision, Generative AI, LLMs, RAG, Agentic AI, Prompt Engineering, Embeddings, Semantic Search, Feature Engineering, Model Evaluation

LLM & Agent Stack: LangChain, LangGraph, Hugging Face, Ollama, Gemini, OpenAI, Anthropic, Multi-Agent Systems, LLM Orchestration

Data & ML Libraries: Pandas, NumPy, Scikit-learn, PyTorch, TensorFlow, Keras, Plotly, EDA, ETL, Data Cleaning, Data Visualization, Power BI, Excel, KPI Analysis

Software Engineering: FastAPI, Flask, REST APIs, React, Vite, Android, Jetpack Compose, MVVM, Firebase, Room Database, Git, GitHub, CI/CD, Testing

Cloud / DevOps: AWS, Docker, Kubernetes, PostgreSQL, pgvector, Redis, SQLite, Vector Databases, Model Deployment

Tools: Jupyter Notebook, VS Code, Android Studio, Postman, Linux/CLI

EXPERIENCE

Data Science & AI Intern — Besant Technologies, Bangalore | Feb 2026 – Aug 2026

- Built classification and regression workflows in Python/Scikit-learn: preprocessing, EDA, feature engineering, model evaluation.
- Built ANN, CNN and RNN models using TensorFlow and Keras for deep learning tasks and experimentation.
- Analyzed real-world datasets with Pandas and NumPy; delivered SQL, Excel and Power BI dashboards for business insights.

Android App Development using GenAI Intern — Mindmatrix, Bangalore | Feb 2026 – May 2026

- Developed Android components in Kotlin with GenAI-assisted workflows for UI prototyping, testing and API integration.
- Integrated Firebase and Git/GitHub workflows; applied AI-assisted development to speed up prototyping and implementation.

PROJECTS

PromptForge AI

Python, FastAPI, NiceGUI, RAG, Multi-Agent AI, PostgreSQL, pgvector, Redis, Docker, Pandas, NumPy, Plotly

- Built a prompt engineering platform for multimodal prompt generation, optimization, evaluation, versioning, RAG retrieval, security guardrails, analytics and multi-agent orchestration.

ULTRON VA

Python, Flask, JavaScript, HTML, CSS, Ollama, Llama 3.2, Speech Recognition, REST API

- Developed an AI voice assistant with local Llama 3.2 inference, browser speech interaction, web commands, weather/time utilities and a Flask-based web interface.

TruthLens — AI-Powered Reality Checker

Python, Scikit-learn, PyTorch, CNN, FastAPI, React, Vite, SQLite, Gemini

- Built a full-stack fake-news detection and verification system combining TF-IDF + Logistic Regression, a 1D CNN, live web fact-checking, confidence scoring, Gemini explanations and a React dashboard.

EchoFit — AI-Powered Fitness Application

Kotlin, Jetpack Compose, Firebase, Room, Gemini API, TypeScript, React, Vite

- Built an AI fitness and nutrition companion with meal-image calorie estimation, progress assessment, workout and nutrition tracking, offline AI fallback, reminders and cloud synchronization.

EDUCATION

B.E. — Artificial Intelligence & Machine Learning — Bangalore Technological Institute, Bangalore | May 2026 | CGPA: 8.0 / 10

CERTIFICATIONS

- [GenAI with Python V2 — ChaiCode](#)
- [AI-Machine Learning Engineer Certificate Course — Reliance Foundation Skilling Academy](#)
- [Foundations of Prompt Engineering — AWS Training & Certification](#)
- [AI Fluency: Framework & Foundations — Anthropic](#)

ACHIEVEMENTS & ADDITIONAL EXPERIENCE

- Built Data Analyst dashboards in Power BI, Excel and SQL across retail, customer, food-service, COVID-19 and sales datasets.
- Attended AI/ML workshops and technical webinars on emerging AI technologies and applied development.
- Completed 24 AI-building challenges: rapid prototyping, prompt engineering and GenAI-assisted development.
- Completed Web Development and Python internships applying programming and software engineering fundamentals.
